Weber
PACKAGING SOLUTIONS

Weber
PACKAGING SOLUTIONS

Weber's offering of high-performance, thermal-transfer labels is the answer to problem free labelling. Our general purpose labels satisfy numerous industrial applications, especially if you're labelling drums, packaging film, plastic, glass or metal. Weber also supplies compatible thermal-transfer ribbons for reliable, cost-effective printing.

Take a look at our stock labels featured here. If you don't see the size you require, don't worry - just email or call us with your requirements and we'll have a member of our sales team help you find a solution.
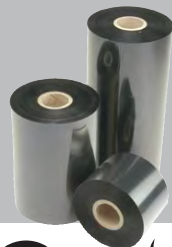

Our stock vellum labels are ideal for automotive bar coding, inventory control, work-in-progress and lower-temperature applications. The material combines a matte-coated, ultra-smooth paper facesheet with a permanent acrylic adhesive.

...and don't forget the ribbons !

Thermal Transfer Ribbons
Choosing the correct one:

Weber's long experience with thermal-transfer print technologies and compatible label materials has given us a broad understanding of exactly which ribbon is best suited to your particular application. Our thermal-transfer ribbons operate with a wide variety of label printers and printer-applicators from today's leading manufacturers. Each ribbon is formulated to print high-density barcodes, text and graphics for product identification, work-in-progress, inventory control, shipping and other applications.

Easymark

Easymark is a premium wax grade, resin enhanced especially for maximum print performance. High carbon content guarantees a crisp, sharp black image - so crucial for the printing of graphics, text and barcodes. Manufactured with a hot melt or solvent based process, Wax ribbons will print at higher speeds and lower temperatures than wax resin or resin ribbons. Our wax thermal ribbons have been developed to provide maximum performance upon a broad range of coated and plain paper. Image density, edge definition and a low energy release combine to deliver a rock-solid solution for today's markets.

Duraprint

Duraprint grade of thermal ribbon is designed to work with flat head technology printers, providing perfect printer performance. Wax resin is a high-end solution, particularly suited to the high volume segment of labelling, providing versatility over a broad range of both film media and paper. Coated with a combination of wax and resin ink formulations, Wax Resin thermal ribbons offer more print durability than wax ribbons. Scratch and abrasion resistance is also superior to that of wax ribbons but inferior to full resin ribbons. Outstanding image density, edge definition and a low energy release deliver a solid, single source solution for today's markets

Ultraplate

Ultraplate ribbons are UL approved resin ribbon crafted to work with flat head thermal transfer printers operating in industrial conditions. Resin is another premium solution best suited where high durability is of paramount importance, offering exceptional versatility over an enormous range of synthetic and paper media. Manufactured with a pure resin coating, Resin ribbons have the highest degree of scratch and abrasion resistance and can withstand heat and most chemicals. Printing must be carried out at lower speeds and higher temperatures and the best print results are achieved on synthetic materials. Outstanding image density, edge definition and a low energy release delivers a solid solution for today's markets.

Please note: Where stronger, more abrasive chemicals are being used please ask about our extreme resin ribbons.

Colour Ribbons

Weber offers an array of colours in wax, wax/resin, and resin formulations for standard and near-edge printers. You can employ colour to improve the appearance of your packaging, streamline your operation with colour-coding, and aid in keeping your pre-printed label inventory to a minimum.

*Bar code scannability must be tested when using colour ribbons.

Printhead Cleaning Made Easy

No Mess - No Waste - No Fuss !

Thermalwipe

DIRECTIONS:
- Turn Power 'OFF'
- Remove Media.
- Open & Unfold Thermalwipe.
- Insert Thermalwipe into equipment & place on printhead or reader.
- Move Thermalwipe in a back & forth side to side motion over the head.
- Dispose of Thermalwipe properly.

CLEANS ALL YOUR THERMAL PRINTERS & BARCODE READERS

Weber
LABELLING & CODING SOLUTIONS

Use a Weber Thermalwipe regularly to extend the life of your Thermal Transfer Printers & Readers

Thermalcard

RECOMMENDED TO CLEAN ALL YOUR THERMAL PRINTERS

DIRECTIONS:
- Turn Power 'OFF'
- Remove Media.
- Open & remove Thermalcard
- Insert Thermalcard into feed path
- Press form feed or manually pull cleaning Thermalcard using both hands until the entire Thermalcard has been pulled free.
- Repeat process if necessary.

Use a Weber Thermalcard regularly to extend the life of your Thermal Transfer Printers & Readers

(FLAMMABLE)

Thermalpen

DESIGNED TO REMOVE BUILT-UP CONTAMINANTS ON PRINTHEADS

DIRECTIONS:
- Turn Power 'OFF'
- Insert Thermalpen
- Swipe pen in a back and forth motion across the printhead. Repeat if necessary.
- Wipe pen tip across clean paper surface to clean pen nib.
- Dispose of Thermalpen properly.

(CAUTION: FLAMMABLE)

Weber
LABELLING & CODING SOLUTIONS

Keep Thermal Printheads Clean!

In bar code printers, the main cause of premature printhead failure is a buildup of adhesive, label residue and other contaminants.

This creates a baked-on coating that heat produced by the printhead cannot penetrate. The trapped heat burns out the dots. With bar code thermal printers, failure of only two dots can render the printhead useless.

End user maintenance has a direct and dramatic effect on the productive life of a printhead. According to a leading thermal printer manufacturer, a maintenance program can decrease printhead failures by 80%. In addition to guarding against dot failure, cleaning printheads on a regular basis helps prevent or eliminate repetitive voids in bar code images.

Cleaning should be convenient for operators and scheduled at consistent intervals (for example, when you change label or ticket stock). Weber provides three presaturated products to clean thermal printheads.

The **Thermalcard**, **Thermalpen** and **Thermalwipe**. The concept behind presaturated cleaning supplies is simple: the easier it is for operators to clean printheads, the more likely it is they will do it regularly.

Thermalwipe	100 / Box	£19.50 (per box)
Thermalcard	25 / Box	£14.00 (per box)
Thermalpen	12 / Box	£10.00 (per box)

All prices are exclusive of VAT & delivery. Terms & Conditions are available on request.
